POWERSOUND MARMITTE

Interamente realizzate a mano con i migliori materiali e con grande attenzione per la finitura, sono prive di paratie di silenziamento interno per fornire prestazioni elevatissime sia ai bassi che agli alti regimi. Un accurato studio del silenziatore ha permesso di contenere le emissioni sonore entro valori estremamente bassi.

Entirely handmade from the best materials available and with great attention paid to their finish, the silencers have no internal muffler walls so that they give excellent performance at both high and low engine speeds. Careful design of the silencers means that sound emissions are kept to very low levels.

**SPRING
SLIDER**

Esclusivo dispositivo, coperto da brevetto internazionale, costituito da un cuscinetto assiale ultrapiatto abbinato ad una specifica molla di contrasto: isolando la molla di contrasto dalla torsione delle pulegge condotte, allunga la vita della molla migliorando notevolmente prestazioni ed affidabilità.

This exclusive item has an international patent. It is made up of an ultraflat axial bearing combined with a particular return spring: isolation of the return spring from the torsion of the driven pulleys lengthens the working life of the spring, thus notably improving performance and reliability.

SPRING SLIDER

Esclusivo dispositivo, coperto da brevetto internazionale, costituito da un cuscinetto assiale ultrapiatto abbinato ad una specifica molla di contrasto: isolando la molla di contrasto dalla torsione delle pulegge condotte, allunga la vita della molla migliorando notevolmente prestazioni ed affidabilità.

This exclusive item has an international patent. It is made up of an ultraflat axial bearing combined with a particular return spring: isolation of the return spring from the torsion of the driven pulleys lengthens the working life of the spring, thus notably improving performance and reliability.
